

Booking of parking spaces in advance: Vienna Airport offers online booking system for parking

Effective immediately all parking spaces for automobiles at Vienna Airport can also be booked online. A precise cost comparison of the different parking options facilitates the booking of parking spaces.

With immediate effect, travelers and people picking up passengers can select and book a particular parking space at Vienna Airport by using the Website of Vienna Airport at www.viennaairport.com. All car parks and the corresponding rates are listed after entering the desired booking period. In this way travelers have a good overview of the available parking spaces at the airport, their location in relation to the terminal buildings and the parking costs. Payment can be made using a credit card.

Just a few clicks for a parking space

After successfully booking a parking space, customers will receive their booking confirmation via an e-mail, which can be printed or used on the person's mobile phone. The confirmation contains a QR code which is read by the car park entrance barrier. The customer then receives a parking ticket which is later used as the exit ticket from the parking lot. Customers must pay extra if the booking and grace periods are exceeded. The Website is unique in the world because it is online in five different languages: Hungarian, Czech and Slovakian in addition to German and English. This is designed to reflect the surrounding region served by Vienna Airport.

The new online parking space booking system can be directly accessed at parking.viennaairport.com or via the Website of Vienna Airport at www.viennaairport.com.
