- Productivity improvement: 1.6% less employees on average and minus 5.4% at year-end.
- Important development in 2012: Contract renegotiation with AUA completed; incl. option to extend the contract up to seven years – this step should secure the long-term profitability of the business.

**Revenue in detail
(share and changes vs. 2011)**

Expenses

- **Consumables and services used:** slightly higher due to higher energy consumption
- **Personnel:** declining due to productivity improvement - in spite of wage and salary increases mandated by collective bargaining agreements. Number of employees reduced by 194 since year-end 2011 to 4,306, despite opening of Check-in 3.
- **Other operating expenses:** additional cost for third party services, maintenance, damages and valuation allowances for doubtful receivables (bankruptcy Sardana Group) – were partially offset by reversed allowances, lower expenses for marketing and market communication and a decline in legal, auditing and consulting fees.
- **Depreciation, amortisation and impairment:** lower than 2011. The higher depreciation (+€ 31.8 mill.) due to Check-in 3 was more than offset by exceptional write-offs in 2011, which were € 40.2 mill. higher than 2012. (The exceptional write-offs in 2012 included € 15.2 mill. for cargo and office buildings, goodwill and property plant and equipment)

Consumables and services used	-43.2	-42.1	+2.7

Depreciation, amortisation and impairment	-113.4	-121.8	-6.9

Net debt (in € mill.)	719.6	751.7	-4.3

- **Cash flow from investing activities** fell by € 60.8 mill. in 2012. The major reason for this was the lower level of investments for Check-in 3
- **Cash flow from financing activities** negative in 2012 mainly due to repayment of long-term financial liabilities and dividend payment (€ 21 mill.) in contrast to 2011.
- **Investments (CAPEX)** € 101.8 mill. – largest component for the terminal extension Check-in 3
